— Medium (9ft) Single Feather Flag —

Black Line = Cut line, extend artwork to edge of black line. Red Line = Safe zone, keep all important info inside red line.

HELPFUL INSTRUCTIONS:

- 1. Please remember, these flags are for "at a glance viewing". What we mean is, you want to grab attention and get a quick message across to your audience but not bog them down with too much information they can't read on the fly. So keep it simple, put the important information.
- 2. If you want your flag to face the opposite way, simply flip the template. We can print and finish the flag so the sleeve for the pole is one either side. Don't forget whatever side you have the pole on and artwork facing, the opposite side on our Single-Sided flags will be a mirrored (backwards) image of your artwork.
- 3. We print full color (CMYK) at 300 dpi. If your artwork is in vector please leave it in vector (we prefer it), if your artwork is in a JPG (photo form) make sure the resolution is a minimum of 100 dpi.
- 4. Remember, to outline all fonts and link all images.
- 5. If you need any design help you can choose Let Us Design during the order process and let our professional design team design a basic layout for you with your text and graphics. You can request any changes to the proof.
